

Wherever your educational professionals are on the invention education pathway, we've got a professional development opportunity to support them and you.

The Lemelson-MIT Program (LMIT) offers a variety of opportunities for K-14 educators, administrators, and after-school providers to learn about invention education and earn professional development points.

Invention Education: For Real

Real People, Real Problems, Real Solutions

LMIT hosts professional development workshops throughout the year offering the most current invention education best practices and efforts. These workshops are a great first step on the invention education journey.

Invention Adventures Sessions

Invention Adventures is aimed at K-12 educators and after-school providers who want to learn more about Invention Education and state or national Invention Conventions. With the support of LMIT staff, educators learn to facilitate project-based invention education programs, which help students build inventions they can then submit to these events.

.Not sure where to join the invention education pathway?

Below are some suggestions based on one's experience with invention education and one's professional role.

New to Invention Education

Start with:

Invention Adventures

Next steps

- Invention Education Workshops
- Partners in Invention Education

Invention Education Advocates

Start with:

Invention Education Workshops

Next steps

- Invention Conventions (MA, CA)
- Invention Adventures
- Partners in Invention Education

District Leaders

Start with:

Invention Education Workshops

Next steps

- Partners in Invention Education
- Invention Adventures
