

# Lemelson-MIT 2023 Student Research Program

**Join us this summer!**  
**\$20 per hour**

June 19–August 4, 2023

The Lemelson-MIT Program (LMIT) is looking to select up to six MIT students to assist conducting observations, interviewing adults engaged in invention education, and working with invention education workshop records.

Student researchers will receive guidance and support, including opportunities for learning the basics of ethnographic research while engaging in participant observation and interviews with adults attending LMIT's summer invention education workshop.

Students will also have opportunities to hear from experts in the field with a background in product ethnography.

Accepted students will be paid \$20 per hour and will be expected to work remotely (online) up to 40 hours per week across a six-week period from June 19–August 4, 2023.

**Application preference is given for those who apply prior to December 1, 2022 at 11:59 pm ET.** Positions will be first come, first served after this date.

In support of LMIT's commitment to diversity, equity, and inclusion, we strongly encourage students from underrepresented groups to apply.

[The Lemelson-MIT Program](#) has helped thousands of students and educators learn to invent and has recognized hundred of collegiate and mid-career inventors for 25 years. Our research offers evidence that our creative, transdisciplinary problem-solving approach known as invention education helps students of all backgrounds develop interest, confidence and capabilities in science, technology, engineering and math (STEM).
